

CREATION MOMENTS

Proclaiming Evidence for Truth

THIS WEEK'S CREATION MOMENT

The Truth Is Out There

And God made the beast of the earth after his kind, and cattle after their kind, and every thing that creepeth upon the earth after his kind: and God saw that it was good. (Genesis 1:25)

Evolutionary theory is remarkably inconsistent. This is a major flaw in the theory, seriously undermining its veracity. But this problem does not often shake peoples' faith in the evolutionary philosophy because they have committed too much to lose.

Fans of the X-Files will remember their assertion that "The Truth Is Out There". So, for those seeking extra-terrestrial intelligence, the question has to be, "How would they recognize if they got a message from an alien intelligence?"

The answer is in the nature of the signal received. It cannot be a regular repeating pattern, as natural objects can produce that. It has to be a recognizable code where combinations of signal portions, representing letters, can be joined to form "words". No such intelligent signal has yet been received. *Or has it?*

Scientists studying the nature of life have been busy decoding DNA. The base-sugar pairs that hold the DNA molecules together represent letters. Their arrangements are not random or repeating, but can be shown to carry information which is of use in causing the organism to function correctly.

So here's the inconsistency. Some scientists say non-random codes are indicative of intelligence, while others assert that non-random DNA codes must have evolved by blind chance. A better explanation is that DNA is an inevitable sign of God's design process.
