*Proclaiming Evidence for Truth*

## THIS WEEK'S CREATION MOMENT

### Diamonds in the Sky?

*Lay not up for yourselves treasures upon earth, where moth and rust doth corrupt, and where thieves break through and steal... For where your treasure is, there will your heart be also. (Matthew 6:19,21)*

Imagine – countless tons of diamonds, virtually free for the taking. Such wealth is the stuff of legends. But now it might be for real. The only catch is that these diamonds, if they exist, are under an atmospheric pressure as high as six million times that on earth, and the temperature could be more than a balmy 12,000 degrees (F). Those are the conditions thought to exist on the planets Uranus and Neptune. Scientists now believe, contrary to their earlier speculation, that simple molecules could not exist in normal forms on these planets. This put an end to speculation about life evolving on these planets. Great pressures, along with extreme heat, force all the carbon atoms to be compressed into diamonds.

Why would God create all those diamonds in a place where they don't do anyone any good? The fact is, God knows that material wealth gives us very little. We human beings begin to realize this fact when we discover that all the wealth in the world is meaningless if no one loves or cares about us.

Our Creator is the only source of true wealth. Through His Son, Jesus Christ, He brings the riches of heaven to the poorest among us. He brings to His children peace that cannot be destroyed by the hottest war zone and gives life that never ends. You can learn more about these riches, which bring both temporal and eternal benefits, in the pages of the Bible.
