

CREATION MOMENTS

Proclaiming Evidence for Truth

THIS WEEK'S CREATION MOMENT

For the Sheer Joy of Variety!

Read Isaiah 45:9

Did you ever try to plan all the details of a simple project? How many plans do you think the Lord had to make when He created living things? A billion? A billion times a billion?

We all know that it takes time to plan the most simple project. Did you ever think about the planning God had to do when He created all the different kinds of living things? Our word "species" today includes many creatures that the Bible counts as being the same "kind" – as when God created the kinds. But God did design the genetic information that allowed the kinds to produce these variations.

Yes, God's act of creating living things was much more than just wishing. Just think that there are more than 20,000 different species of bees – some with very complex societies – and their own languages! The figures and the beauty of it all makes one wonder at God. Why are there 4,500 different species of sponges? Why are some creatures – never seen by humans until this century – so eerily beautiful? For that matter, why have so many different kinds of beautiful flowers?

The variety in the creation reflects some of the joy of creation that God felt and shows us the incredible unbridled creativity of our wonderful God. The fact that there is only one species of human – all related – confirms the human history related in the Bible.

Prayer: Dear heavenly Father, I know that I shall never have Your ability to plan and carry out those plans. I confess that too often I waste the time and energy You give me because I don't even bother to use the abilities you have given me. Forgive me for Jesus' sake, and for His sake help me to be more like You in this. Amen.
