

CREATION MOMENTS

Proclaiming Evidence for Truth

THIS WEEK'S CREATION MOMENT

Technological Secrets from God

Where wast thou when I laid the foundations of the earth? declare, if thou hast understanding. – Job 38:4

A revolutionary design in metal-cutting blades is changing the metal-working industry. These blades don't cut like a knife. Instead, the blade is fixed in one position while the metal to be shaped spins on a lathe. This new-style blade stays sharp six times longer than the old blade design. And where

titanium used to make the old-style cutting blades dull almost the second they were used, the new blades last up to 30 minutes.

This wonderful new blade was developed by two engineers who got the original idea from a rat. You see, rats' teeth always have a sharp edge. Engineers learned that this is because their teeth are hard on one side and soft on the other. So as they wear, they always keep a sharp edge. Using this principle for metal-cutting has lowered costs and increased productivity, since the blades don't have to be changed as often.

Beginning in Job 39, God humbles Job with several chapters of questions about the wise designs found in the animal kingdom. God's message is, "Job, if you think you're so smart, who created all of this with such wisdom?"

Even rats' teeth are created with such wisdom that, once we learned the principle, our technology was greatly improved. In view of this, it doesn't seem at all scientific to say that there is no Creator!
